

Atal Tinkering Laboratories Application and STEM Certification for Teachers

The management is happy to announce that two of our schools viz. St. John's HS Kurumannu and Little Flower HS Chemmalamattom have received Atal Tinkering Laboratories Grant during the previous academic year (2017-18). I take this opportunity to congratulate them.

The Corporate Educational Agency, Diocese of Palai, wishes that all our High Schools and Higher Secondary Schools apply for Grant for establishing Atal Tinkering Laboratories during the next academic year (2018-19).

“Atal Tinkering Laboratories (ATL)” is a National Mission aiming at 1 million Neoteric Innovators among school students in the next five years. ATL is a novel concept for students to develop solutions on any problem around them based on Science, Technology, Engineering and Mathematics (STEM) Methodology. It helps to develop critical and creative thinking among students.

“Atal Tinkering Laboratories (ATL)” is a flagship program of NITI Aayog. Schools with more than 1500 square feet space and remarkable academic achievements can apply for this Grant.

We are organizing a Mentorship Support Program to guide you through the application process. Also plan to conduct a STEM Certification Program for Mathematics and Science Teachers. For further details, contact Sri. Thomas Sebastian, Retired Headmaster, St. John's HS Kurumannu. (Ph. No. 9495875562)
